- Provide you with a ready to use environment to develop or house your

DNS Hosting

We will become the registrar for your ".sch.uk" domain and host the records for the domain.

Web Filtering (including BYOD)

eSafety4schools web filtering enables a whole school approach of age appropriate filtering *and Reporting* for both http and https Internet traffic. With over 20 years' experience of deploying web filtering to schools the team at eSafety4schools is able to quickly and efficiently transfer over your existing policies, guide you through the management portal and answer all your support questions and queries.

Once set up the on-going management of ESafety4schools web filtering service can be undertaken by the schools themselves, their chosen 3rd party Partner or eSafety4schools as part of the 'Managed Web Filtering' service offering as an optional extra—please see P6 .

What is included: -

- Provision of Pupils, Staff and Teacher groups and policies
- AD sync for single sign on and multiple AD group based polices and reports eg YouTube can be accessed by Teachers but not by Pupils.
- Access to Management GUI – link and password provided for either school to use or the schools 3rd party provider or eSafety4schools as part of the Managed service.
- User documentation
- Comprehensive reporting
- Adherence to the governments PREVENT strategy
- Own school allow/deny list
- Customisable deny page to incorporate the school's logo, motif and AUP
- Embedded web threat scanning capabilities, capable of identifying and blocking zero-hour and known web-borne viruses, spyware, malware and other forms of malicious code

What is NOT included: - Day to day management of the solution – esp the local allow and deny list, this is the responsibility of the school or 3rd Party partner or eSafety4schools if the Managed Web Filtering option is chosen as per P6.

MS O365 Email and Filtering

eSafety4schools will take over guardianship of the schools MS O365 'tenancy' and will support the MS Exchange Online service. MS O365 (Exchange Online) provides built-in malware and spam filtering capabilities that help protect inbound and outbound messages from malicious software and help protect your network from spam transferred through email.

Administrators do not need to set up or maintain the filtering technologies, which are enabled by default, but will have access to customise or create additional filters. eSafety4schools will set up a weekly report for you.

What is included: -

- Tenancy Support such as licencing and subscription issues, Domain and DNS issues.
- Anti Malware Protection, Anti-Spam Protection, Quarantine
- Set up of Weekly Report of emails with Virus (spam/malware)
- More details of the extensive built in security can be found here—
<https://technet.microsoft.com/en-us/library/jj200731%28v=exchg.150%29.aspx>

What is NOT included:

- For anything other than O365 please contact emPSN Direct eg On Site exchange servers, Gmail etc.,
- Day to day management of users – adding/deleting e-mail address
- Administration of the schools existing anti Spam/Malware/Quarantine policies
- Release of quarantined e-mails
- MS Advanced Threat Protection – MS latest e-mail security is available at £1 per mailbox per month
- <https://blogs.office.com/2015/04/08/introducing-exchange-online-advanced-threat-protection/>
- This option may be suitable for the schools generic e-mail address as well as the Heads and Snr Leadership Team.
- Support for all other MS O365 products - Yammer, SharePoint, Skype, Azure, etc.

All the above administrative duties are the responsibility of the school or their 3rd party support provider not eSafety4schools.

WEB HOSTING

We will connect your domain to our web hosting solution to provide you with a ready to use environment to develop or house your web site.

Packed with features and applications ready to use and install with the click of a button.

What is included: -

- 10GB web space, 50GB bandwidth, 1 website, 1 database
- Applications such as WordPress, Droopla, moodle, joomla and many more.
- Apache with PHP FPM, Nginx with powerful caching, Site Preview
- Powerful Web Analytics with GeoIP Support (AWStats)
- Support of domain and hosting core platform

What is NOT included:

- *Webmail – we recommend using office365 for full featured email service.*
- *Software support – help sites and forums are available for most applications you install with the manufacturer of the software*

DNS HOSTING

We will become the registrar for your “.sch.uk” domain and host the records for the domain.

What is included: -

- Management of your school domain name and associated records, and changes to those records.

What is NOT included:

- Additional and other domains and associated records.

This Bundle of products has been specifically designed to be a complimentary suite of services that work alongside a schools existing 3rd party on site support company.

eSafety4schools has full Terms and Conditions on its web site as well as a comprehensive SLA that details how and when support is provided. All elements of the platform that delivers the services are monitored 24 x 7, and each element of the platform has redundancy built in.

eSafety4schools prides itself on its service and support, from the easy to use Provisioning form to the welcome letter and Administration document that have been specifically written for non-technical people to use.

If you are looking for a single point of contact for all your Web and Mail needs, this Bundle will provide it for you. With over 400 schools on our services already we are highly experienced in the unique requirements and challenges that schools face in their day to day use of the Internet and email.

Working with over 20 'on-site support' partners already we know how to establish and maintain a relationship with your existing trusted IT support company.

Feel free to call us directly on 0333 344 6501 or have your existing IT support company call to find out more details.

Managed Web Filtering (£300 per School)

“All schools will be required to put in place strengthened measures to protect children from harm online - including cyber bullying, pornography and the risk of radicalisation - under plans unveiled by Education Secretary Nicky Morgan (22 December 2015). Under the proposals published today for consultation, all schools will need to have appropriate filters and monitoring systems, so that no child can access harmful content via the school’s IT systems and concerns can be spotted quickly (www.gov.uk)

Protect esafety Monitoring

To enable schools to quickly and cost effectively meet the above requirements eSafety4schools provides a comprehensive Managed Web Filtering service which alleviates the time and effort that a school would otherwise be required to spend keeping on top of all Web Filtering issues.

This service is provided by an ex LA officer with many years’ experience in eSafety who specializes in working collaboratively with schools so that they all benefit from each other’s experience.

What is included: -

- Active management of the schools Web Filtering Policies
- Individual support for the school from an expert
- Management of the schools local allow and deny list
- Comprehensive review of questionable site – both those allowed that maybe should have been blocked and those blocked that maybe should have been allowed This is where 15 years of eSafety experience at a LA is invaluable as the person reviewing the sites always bases the decision from a Childs Safeguarding perspective
- Report Generation for the school showing user activity
- Overall interpretation of schools Web Filtering requirements

What is NOT included: -

- Support for anything other than eSafety4schools Web Filtering

ADDITIONAL PRODUCT PRICED SEPERATELY TO BUNDLE

As well as the 12 month price published with the offer there are further discounts available if the school is able to purchase a 36 month licence with the full price paid up front

Pricing for 36 Months
