for the public good**

emPSN Secure Network

Filtering

It is essential your internet connection includes a filtering option. Filtering ensures you can provide the school-specific level of safeguarding and security for your broadband connection for students and staff.

Filtering Options

Filtering Type	Price
Standard	From £1.61 per user*
Transparent	From £2.32 per user*

**Subject to set up costs. Other options available on request. Please contact us for a quote.*

What is transparent filtering?

Transparent filtering does not require proxy settings within client browsers to be enabled. This makes it simple and quick to enable and implement because there is no client browser configuration necessary. This means you can use transparent filtering with Bring Your Own Device (BYOD).

What is standard filtering?

Standard filtering requires the browser to be configured to use or look for a proxy server. This means there is some initial setup but this can offer a huge amount of flexibility.

For more information on filtering options, visit www.empsn.org.uk/filtering.

Application Services

Who we are

emPSN provide broadband connectivity and online IT safety services to schools in the UK.

Our services are provided through a catalogue of trusted suppliers, each of which have been through a rigorous procurement process.

Our small team are based in offices in Northamptonshire and we work with a range of service providers to offer a wide array of internet services and connectivity through our secure network.

We offer our customers a variety of benefits, as well as a choice of buying options, and all the services you take from us are issued on just one bill.

We securely connect **1200+** organisations to each other, the NEN, the internet and a wide range of services.

To discuss your school's requirements and find out more, contact the emPSN office or visit our website:
